

VIRTUAL PORTAL FOR INTERACTION AND ICT TRAINING FOR PEOPLE WITH DISABILITIES

ViPi AIMS:

ViPi aims at a “one-stop-shop” interactive portal and training environment for people with disabilities, offering:

- Basic ICT learning courses taught via an innovative pedagogical approach;
- Educational desktop and mobile (Android) games;
- Networking and community services for people with disabilities and training material providers;
- Large repository of Learning Objects (provided by the project as well as by interested third parties) freely available and fully accessible;
- Supported in Dutch, English, Greek and Lithuanian.

BENEFICIARIES ARE:

- People with disabilities who are looking to acquire practical basic ICT skills;
- Special education trainers and learning facilitators who are willing to introduce user-oriented and internet-facilitated approaches in ICT training;
- Disability officers working in educational institutions;
- VET centres;
- Company training departments;
- Supported employment and pre-vocational projects;
- Bodies providing counselling;
- Pre-vocational groups in tertiary or non-tertiary education;
- Third sector social partners;
- Day care centres;
- Governmental bodies;
- Other Lifelong Learning programme or related projects.
